

Pump Specification

Pressure ratio:	1:220
Displacement volume (cm ³)	0,6
Discharge (bar)	2068

Performance Graf MSF189-HT

The test unit MSF189-HT is a double acting air driven pump for oil, water or chemical media. The hydraulic unit is ready for connection which is provided for generating operating pressures up to 2068 bar. The hydraulic system can be used for all kinds of pressure testing and burst testing or for other functions requiring a determined pressure. The test unit can as well be used for injection of liquids and chemicals.

The test unit is equipped with a 7 liter reservoir and a built-in Mechanical Chart Recorder 0-30.000 PSI, and hand pump.
