

The test unit is a double acting air driven pump for oil, water or chemical media. The hydraulic unit is ready for connection, provided for generating operating pressures up 20.000PSI (Several ranges of flow and pressure to choose from). The system is perfect for all kinds of pressure testing, burst testing or for other functions requiring a determined pressure. The unit can also be used for injection of liquids and chemicals. Can also be delivered with manual hand pump as shown in photo.

- Design Pressure 20K PSI
- MWP 20K PSI
- Tubes & fittings: All tubing and fittings in SS316 Fitok MP anti vibration.
- Easy to transport and storing
- Reservoir 2-3 Liter
- Recorder Prepared for two ports nVision recorder
- Unit according to Norsok 2015 Temporary Equipment and ATEX approved for Zone 2
